

## Polygomma™ Seam Tape

### Technical Data Sheet

The Polygomma Seam Tape is a self-adhesive tape manufactured from a high quality rubber compound, and is self-protected by a double sided release paper. The Polygomma Seam Tape is used to overlap the field joints of the Polygomma EPDM Roofing/Waterproofing Membrane and the Polygomma EPDM Pond Liners.

#### Suggested Installation Guide

- P The overlap surfaces, on the bottom and the top EPDM membrane/liner, should be clean, dry, smooth and dust-free.
- P Clean the overlap areas with toluene, and wait for it to dry.
- P Unroll the tape till the desired length is reached.
- P Remove the release paper, and let the overlap area of the upper membrane fall on the seam tape.
- P Press the overlap with a roller to achieve a secured overlap joint/seam.

For detailed installation procedure, please contact the supplier.

#### Storage

The Seam Tapes must be stored in a cool, clean and dry premise, at or below 25°C. The shelf life of the material is 12 months.

#### Physical Characteristics

- P Excellent adhesion properties.
- P Resistance to heat and cold.
- P Resistance to UV and ageing.
- P Solvent free.

#### Characteristics (When Packed)

Base Material	Rubber Polymer
Colour	Black
Solids	100%
Application Temperature	0°C to 45°C
Service Temperature	0°C to 100°C

## Dimensions and Packaging

**Standard Length:** 30 meters

**Standard Width:** 50 mm/75 mm

The rolls are packed in corrugated boxes. Specific widths may be available upon request.

## Safety and Precautions

The material is not hazardous for general uses. Keep out of reach of children.

Possible handling risks, cuts and abrasions in particular conditions.
